Eco-Luxury Living At Pranava One Hyderabad

Along with a change of taste, there is a rising need for a greener outlook in today's rapidly changing times.

We've transformed the idea of luxury and made it sustainable by giving back to nature.

One hyderabad is planned, designed and developed to work in harmony with nature and with a minimal impact, whilst embodying the style and standard expected of luxury living.

THE GREEN VISION

Live The Green Life

There is a rising need for a greener outlook in today's rapidly changing times.

The facade of the building is lined with clay mud brick to reduce temperatures naturally while also adding an aesthetic value to the gorgeous structure.

Total ground coverage is only 29% while the remaining 71% comprises of open spaces and sprawling greens.

A vertical garden spread across 75 metres height adds to the aesthetic beauty of this environment friendly marvel.

Community Farming

Grow your very own organic produce in the backyard!

The very first of its kind, the residential complex houses with aesthetically designed step garden to grow your favourite vegetables and fruits without having to ever leave the comfort of your apartment complex.

Talk about living green!

Biophilia-Inspired Architecture

Exposure to nature has never been more important than it is today. We're spending more time than ever before indoors and away from the natural world.

At Pranava One Hyderabad, we've taken this philosophy as our core belief.

Biophilia has led to somewhat of a renaissance within the construction and architectural industries as wellness and sustainable design practices take the forefront.

Core Features Of Biophilia:

- Scattered, clustered, varied vegetation
- Overlooking landscapes
- Blurring the boundaries between the indoors and outdoors
- Dynamic and diffused light
- Natural scents
- Proximity to a water body
- Use of natural and local materials
- Shelter and privacy

RETHINKING URBAN LIVING

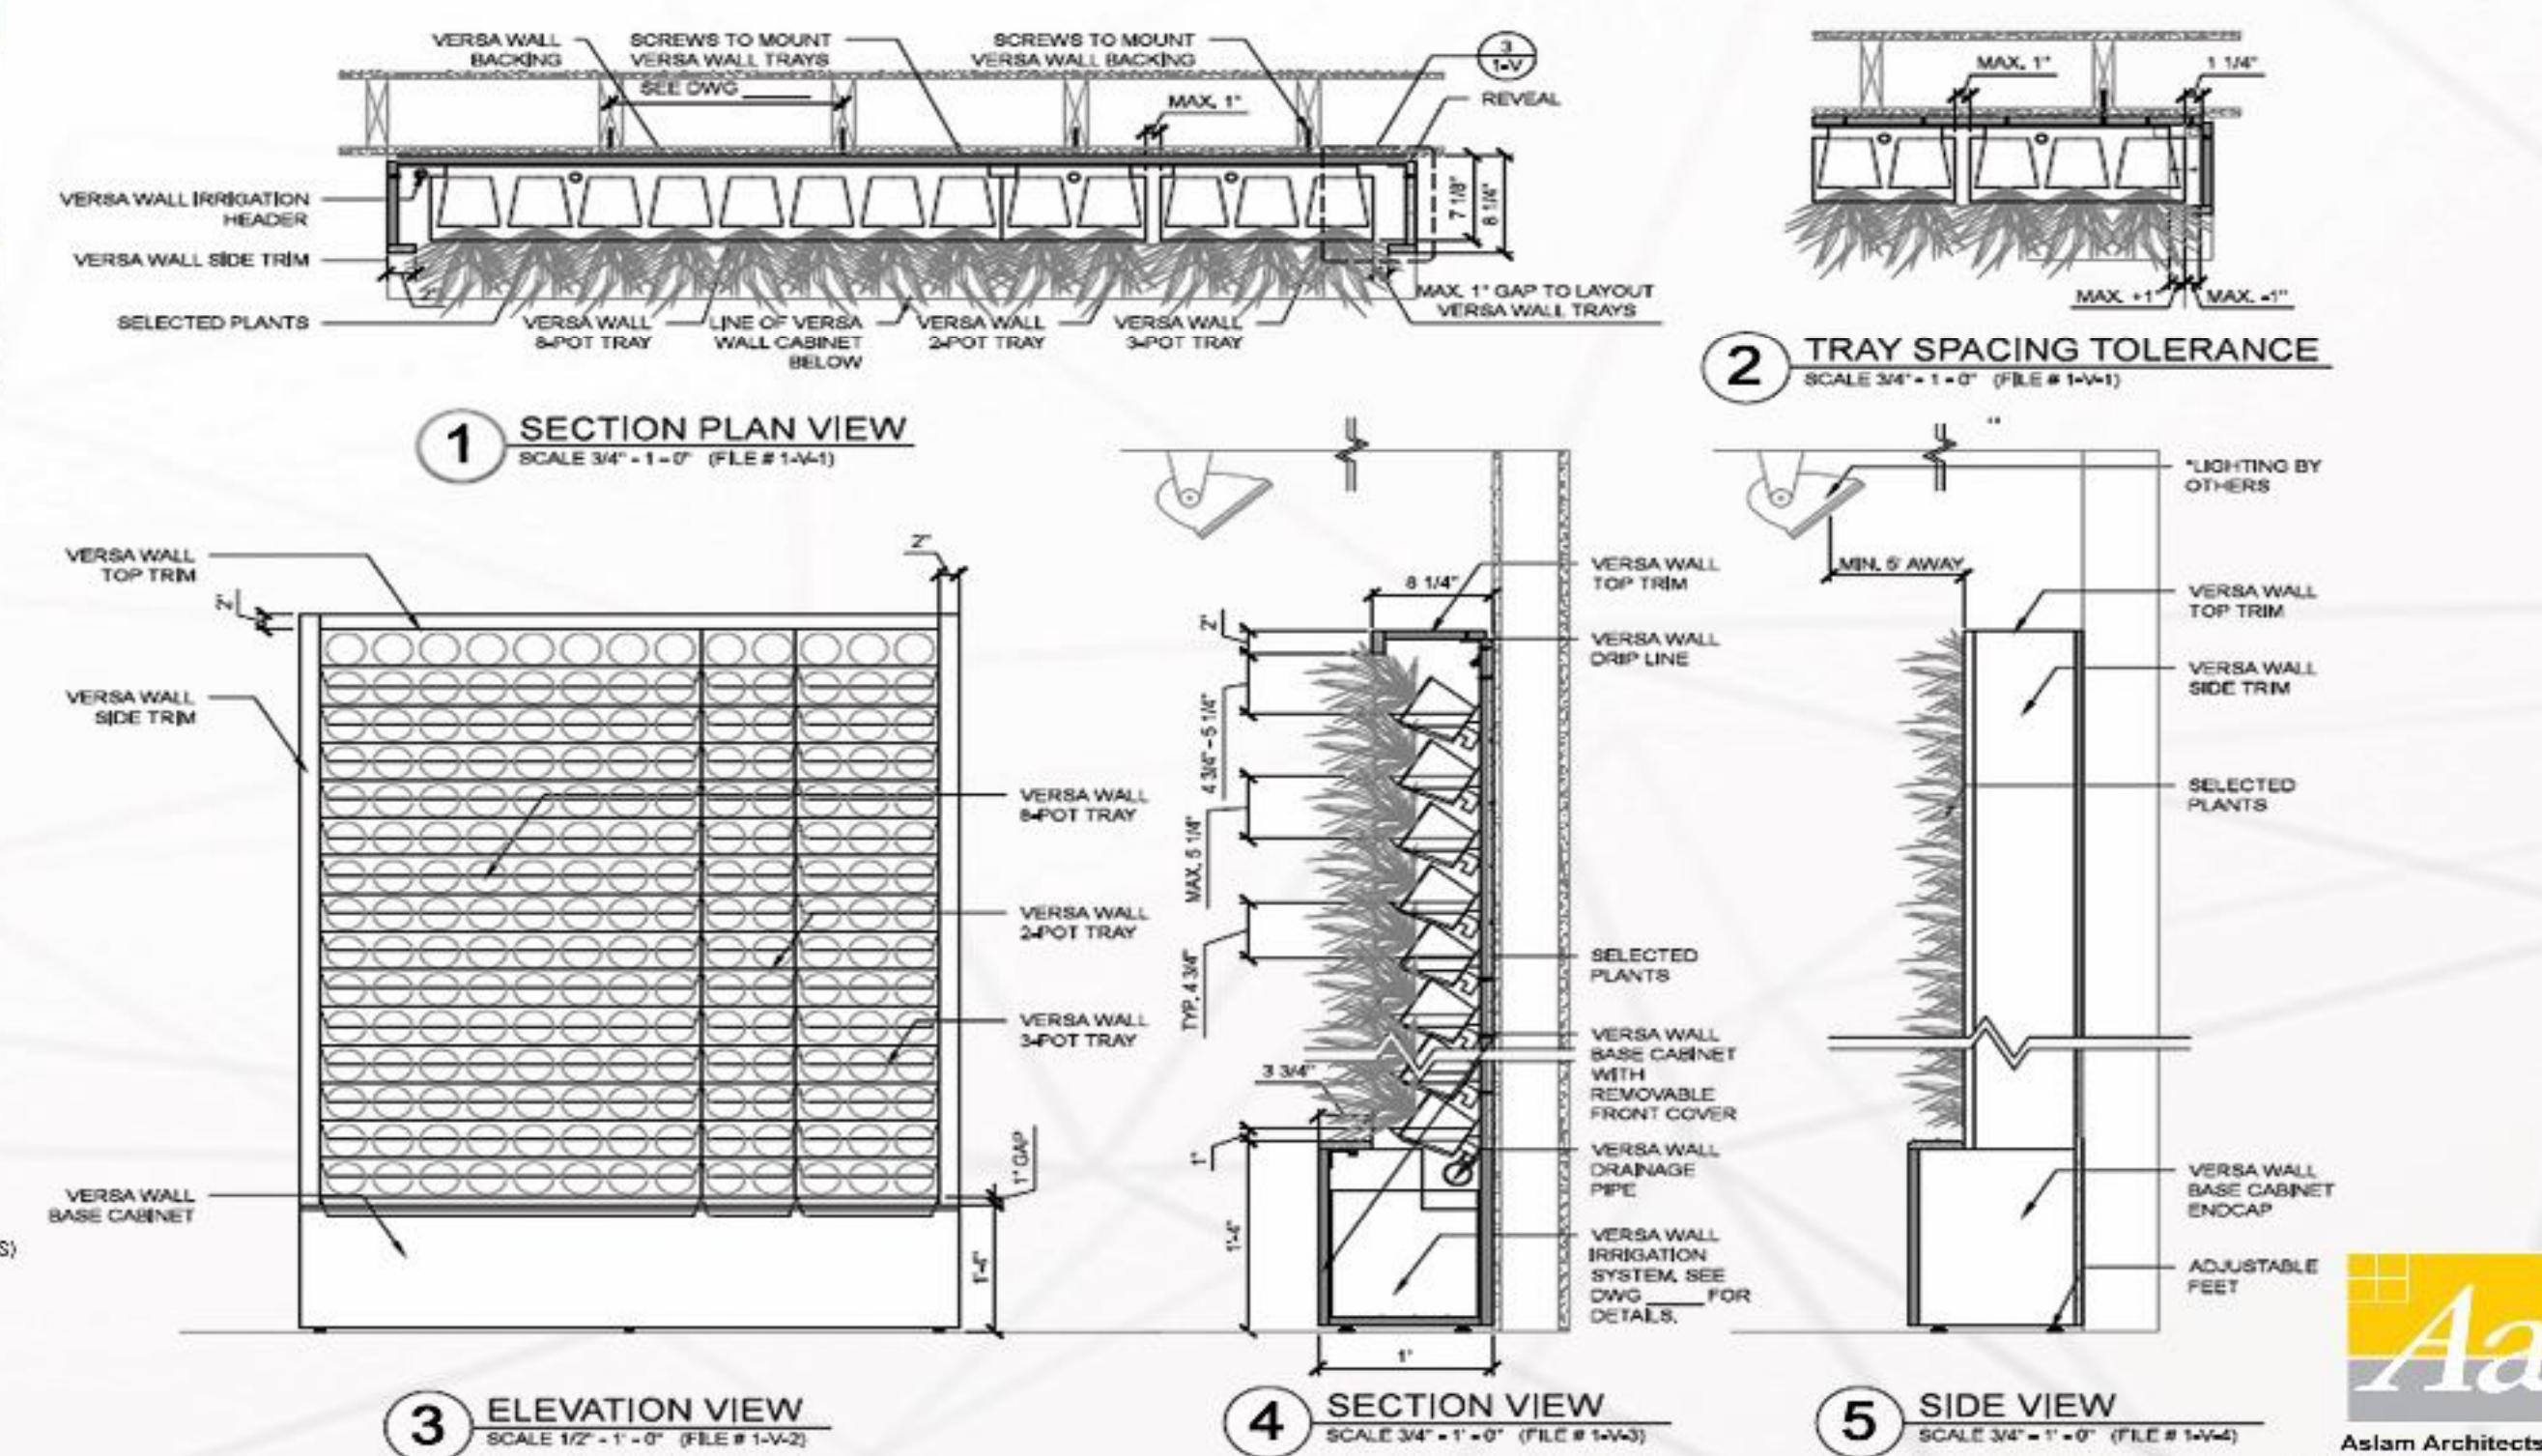

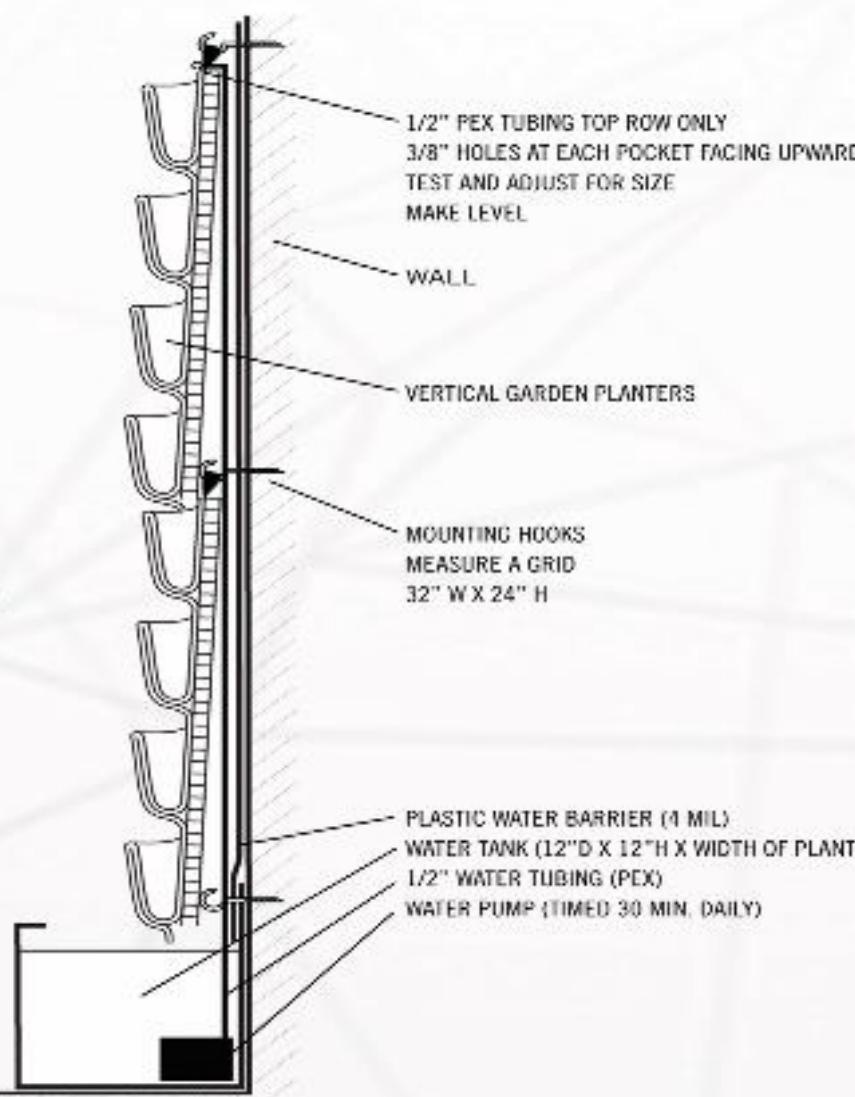

BIOPHILIC DESIGN

BIOPHILIA IS DEFINED AS THE INHERENT HUMAN INCLINATION TO AFFILIATE WITH NATURE. THE MORAL IMPERATIVE OF BIOPHILIA IS THAT WE CANNOT FLOURISH AS INDIVIDUALS OR AS A SPECIES WITHOUT A COMPASSIONATE AND CONSIDERATE RELATIONSHIP TO THE WORLD BEYOND OURSELVES OF WHICH WE ARE A PART. BIOPHILIC DESIGN, AN EXTENSION OF BIOPHILIA, INCORPORATES NATURAL MATERIALS, NATURAL LIGHT, VEGETATION, NATURE VIEWS AND OTHER EXPERIENCES OF THE NATURAL WORLD INTO THE MODERN BUILT ENVIRONMENT.

AS OUR LIVES HAVE BECOME INCREASINGLY URBANISED, OUR CONNECTION TO NATURE - NATURAL LIGHT, GREEN SPACES AND ORGANIC MATERIALS - HAVE DIMINISHED. HOWEVER, DEVELOPMENTS IN TECHNOLOGY AND NEW ATTITUDES TO DESIGN - AS WELL AS SOME VERY PERSUASIVE RESEARCH ON THE SUBJECT - ARE LEADING TO POSITIVE CHANGE, ALBEIT ONLY IN A HANDFUL OF TRAILBLAZING PROJECTS.
